Fran Luengo Rojas

Java Fullstack Developer at EBN Banco
Madrid, Community of Madrid, Spain

Summary

I am a Software Developer with a solid background in Java-based technologies and recent formal training in cybersecurity. I have experience developing and maintaining backend services using Java, Spring Boot, JPA, and SQL, as well as building frontend applications with Angular, TypeScript, and JavaScript. I am proficient in Linux environments and in REST API testing using Postman.

I am an adaptable professional, eager to continuously improve, collaborate in cross-functional teams, and deliver high-quality, secure software solutions. I am currently seeking a mid-level Software Developer role in Spain or remote environments.

Experience

EBN Banco

Java Fullstack Developer

December 2023 - Present (2 years 6 months)

Madrid

- Develop and maintain backend services using Java, Spring Boot, JPA, and SQL for client applications.
- Build and enhance frontend applications with Angular, TypeScript, and JavaScript, ensuring responsiveness and usability.
- Implement REST APIs and test endpoints using Postman, improving integration reliability.
- Collaborate in cross-functional teams, following Agile methodologies to deliver high-quality software solutions.
- Apply cybersecurity principles in code development to enhance application security.

- Participate in the full software development lifecycle, including deployment and maintenance.
- Engaged as an external contractor for one year

Eviden

Application Developer

April 2022 - December 2023 (1 year 9 months)

Madrid, Spain

- Developed frontend applications using Angular, TypeScript, Google Cloud, and Looker.
- Developed and improved MINISDEF's frontend application using Angular, TypeScript, and PrimeNg, ensuring usability and responsiveness.
- Wrote technical documentation and reports for stakeholders, supporting transparency and project continuity.
- Completed a 4-month internship
